

Picard Angst Funds

Systematic Commodity Alpha

Share Class Ph

(CHF hedged, Institutional)

Data as of 28.06.2019

Investment Objective

The fund follows an absolute return approach in the asset class of commodities. Over the medium to long term, the fund seeks to generate steady positive returns independent of the general trend of the asset class (commodity beta) and at a moderate level of volatility.

Investment Strategy

The rich structure of commodity derivatives markets creates opportunities to exploit alternative risk premia apart from commodity beta which compensate investors for accepting exposure to specific risk factors such as the cyclical nature of price dynamics and the term structure of commodities markets. Based on a market-neutral quantitative investment strategy, the fund accesses and combines several of these alternative sources of returns. The strategy possesses an advantageous risk profile exhibiting consistently low correlation with traditional asset classes such as equities and bonds as well as commodity beta. Thus, in the portfolio context, the fund is suitable as a return enhancer and strong diversifier.
